To Project Computer Display

1 Select a computer source. (i.e. build-in desktop computer or your own notebook computer)
   Remark: The LCD projector takes around 30 seconds to warm up.
2 Adjust the volume of the computer sound by pressing the up/down buttons. (if necessary)

To Project Video Signal

1 Select a video source. (i.e. VCR, DVD/VCD or visualizer)
   Remark: The LCD projector takes around 30 seconds to warm up.
2 Control the playback machine by using the FUNCTION buttons. (such as PLAY, PAUSE, etc.)
3 Adjust the volume of the video by pressing the up/down buttons. (if necessary)

After use,
please switch off the LCD projector by holding the PROJECTOR OFF button for 3 seconds.
