**To Project Computer Display**

1. Hold the POWER switch for 1 second on the remote unit, in order to turn the LCD projector on.
   
   Remark: The LCD projector takes around 30 seconds to warm up.

2. Press the button RGB on the same remote unit.

3. Select a computer source. (i.e. build-in desktop computer or your own notebook computer)

4. Adjust the volume of the computer sound by pressing the up/down buttons. (if necessary)

**To Project Video Signal**

1. Hold the POWER switch for 1 second on the remote unit, in order to turn the LCD projector on.

   Remark: The LCD projector takes around 30 seconds to warm up.

2. Press the button VIDEO on the same remote unit.

3. Select a video source. (i.e. VCR, DVD/VCD or visualizer)

4. Control the playback machine by using the FUNCTION buttons. (such as PLAY, PAUSE, etc.)

5. Adjust the volume of the video by pressing the up/down buttons. (if necessary)

After use,
please switch off the LCD projector by holding the PROJECTOR OFF button for 3 seconds.
